Fish Consumption Advisory Boysen Reservoir

Advisory updated 10/26/2016

The Wyoming Game and Fish Department has tested fish from these waterbodies for mercury. The Wyoming Department of Health has provided consumption advice according to mercury levels. To determine the recommended maximum number of meals that may be consumed per month, find the species and length of the fish you caught and follow the recommendations described below. A meal is 8 oz. of uncooked fish or 6 oz. of cooked fish.

Data are available for the species and length-classes shown in the table. Where data are not reported, data are not available, and we recommend that sensitive individuals follow the [General Fish Consumption Advice](#).

Fish species	Length (inches)	Women who might become pregnant, nursing mothers, and children less than 15 years of age	All other persons
<u>Boysen Reservoir</u>			
Black crappie	8-12	Up to 4 meals per month	Up to 8 meals per month
	Greater than 12"	Do not consume	Up to 1 meal per month
Brown trout	15-25	Up to 1 meal per month	Up to 4 meals per month
	Greater than 25"	Do not consume	Up to 1 meal per month
Burbot	12-20	Up to 4 meals per month	Up to 8 meals per month
	20-25	Up to 1 meal per month	Up to 4 meals per month
	Greater than 25"	Do not consume	Up to 1 meal per month
Channel catfish	Greater than 25"	Do not consume	Up to 1 meal per month
Rainbow trout	15-25	Up to 4 meals per month	Up to 8 meals per month
